

MASS NOTIFICATION SOLUTIONS

 **NOTIFIER**<sup>®</sup>  
by Honeywell

# MASS NOTIFICATION — INFORM EVERYONE

In a wide scale emergency, keeping people informed is critical to keeping them safe. Notifying more people of a dangerous and potentially life threatening situation can prevent further injuries and save more lives. Such situations require a mass notification system to broadcast live, up-to-the minute emergency information to everyone in a building, campus, or multiple facilities spread across a city, state...even the globe. To be prepared for such circumstances, look no further than NOTIFIER — Leaders in Life. Safety. Technology.

## NOTIFIER — THE VOICE OF EXPERIENCE

NOTIFIER continuously develops new technologies that improve fire and life safety — an unwavering commitment that's been in effect for over fifty years. Our decades of experience designing and manufacturing the industry's most advanced fire alarm and voice evacuation systems far exceed the five year minimum recommended by the Unified Facilities Criteria (UFC) standard 4-021-01 for Mass Notification Systems. Furthermore, our mass notification solutions can easily integrate with NOTIFIER fire alarm systems, or operate independently as a standalone system.

# LOCALIZED, SINGLE BUILDING EMERGENCIES

A school lockdown, chemical spill or similar emergency, though often limited to a single building and its immediate surrounding area, are situations best addressed using mass notification. Informing everyone in and around the building of the emergency, and instructing them to evacuate, relocate, or remain where they are, is critical to keeping them safe and out of harm's way.

## APPLICATIONS:

- K-12 Schools
- Senior Living Centers
- Factories
- Warehouses
- Office Space

## SMALLER SCALE MASS NOTIFICATION

Using a combination of interior and exterior speakers, and amber strobes, NOTIFIER's FireVoice 25/50 will alert an entire building of an emergency situation, and instruct the occupants on the appropriate course of action. Live emergency paging is easily accomplished using the FireVoice 25/50's integrated microphone.

FireVoice 25/50

## Amber Strobe Appliances

Amber strobe units triggered by the mass notification system accompany the voice instructions to alert occupants that an emergency exists.

## Exterior Speaker Arrays

Large speaker arrays can be installed prior of a building or multiple buildings on a campus. The speakers are driven by the FireVoice 25/50 voice evacuation system, alerting people outdoors in the area of the building.

# WIDE SPREAD MASS NOTIFICATION

Towering high-rises, sprawling college campuses, and mass transit hubs can all have thousands of people occupying them at any given moment. Notifying everyone in these vast areas of an emerging crisis is critical to protecting life safety. NOTIFIER's Digital Voice Command makes it possible.

## DISTRIBUTED DIGITAL VOICE EVACUATION

Digital Voice Command (DVC) systems can be distributed throughout multiple buildings and linked together via the NOTI-FIRE-NET intelligent network. Each system can operate independently in case of a building-specific emergency, or cohesively as part of unified mass notification system for large-scale emergencies. Using the DVC command center, authorized personnel can distribute emergency voice messages to an entire campus or just to specific areas.

Digital Voice Command

## APPLICATIONS:

- Universities
- High-rises
- Corporate Campuses
- Industrial Facilities
- Chemical Plants
- Utility Plants
- Ports
- Mass Transit Hubs
- Sports Arenas
- Government Complexes

## LED Signage

ed on the exte-  
ngs throughout  
y the DVC or  
ystem, inform-  
he emergency.

LED signs can be placed in areas where a large number of people assemble, such as mass transit terminals, sports arenas, and airports.

# WORLDWIDE EMERGENCY NOTIFICATION

Large global corporations, as well as the US and foreign governments have facilities spread across the world. Notifying a facility half-way around the world of a pending threat or potential emergency is not easily accomplished with traditional voice evacuation systems. That's why NOTIFIER harnessed the power of the internet and voice over IP technology to develop NOTIFY-IP.

## MASS NOTIFICATION OVER IP TECHNOLOGY

NOTIFY-IP uses voice over IP technology to send live, direct voice instructions for preserving life and property throughout a large facility, campus, or multiple facilities across the world. Within seconds, facilities all over the world can be notified of a potential or existing emergency. Activation of NOTIFY-IP is simple; the operator selects the desired paging location(s), clicks the "Start Paging" button, and speaks into the microphone with the appropriate emergency message.

## APPLICATIONS:

- Global Corporations
- Industrial Facilities
- Chemical Plants
- Utility Plants
- Mass Transit Hubs
- Government Complexes
